Cloud Strategy?

The trouble with creating a "cloud strategy"?
You're focusing on technology, not business benefit.

(Randy Heffner, Forrester Research)

Why Cloud?

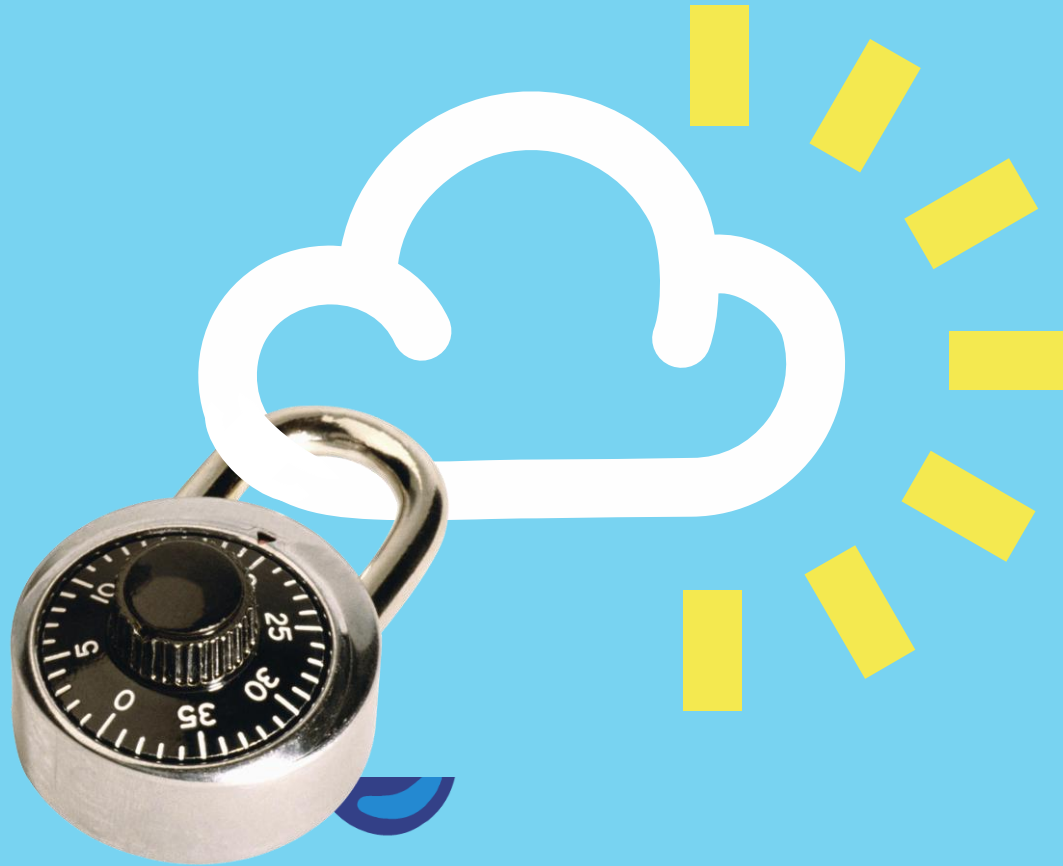

Barriers to Adoption

- Understanding Cost
- Reliability (Network)
- Portability (Lock-in)
- Control
- Performance
- Security
- Change/Inertia

Overcoming the Barriers

Overcoming the Barriers

Hybridization

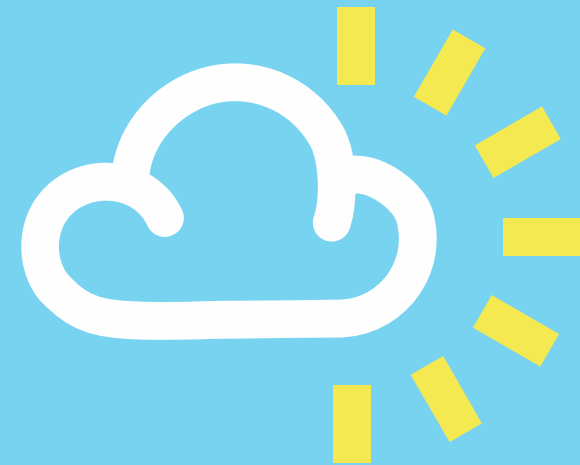

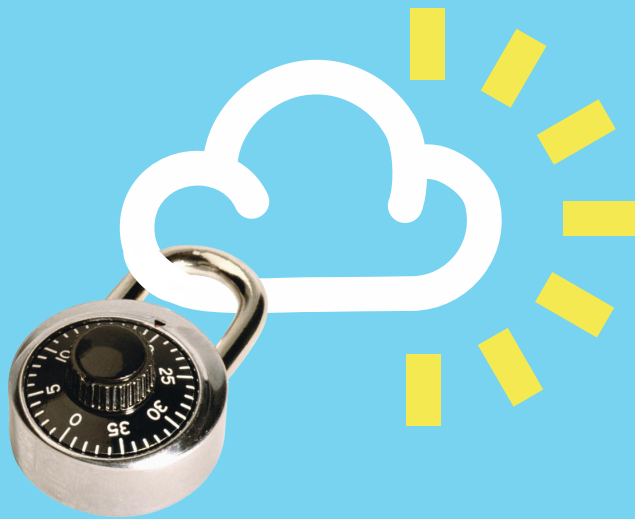

Hybridization

“the IT architecture will be a public private hybrid... If you don't get that kind of platform in place, you will fragment the business instead of optimising it ”

(Andy Mulholland, CTO of CapGemini)

VIDaaS

To the Cloud?

**“There is nothing wrong with change,
if it is in the right direction”**

(Winston Churchill)
